

City Suites Al Khobar Diagnostic Audit

Operational Failure Analysis & Triage Protocol
based on 100 Consecutive Guest Reviews

Reporting Period:	August 2023 – March 2026
Data Pool:	100 Independent Reviews
Current Status:	CRITICAL LIABILITY

SYSTEMIC OPERATIONAL FAILURE
WARRANTS IMMEDIATE TRIAGE

THE VERDICT	CORE VULNERABILITIES	THE MANDATE
Near-universal 1.0 ratings indicate a complete breakdown of basic hospitality standards. The property is currently unlivable for standard guests.	Extreme hygiene hazards (biohazards, pest infestations), critical safety risks (electrified plumbing, exposed wiring), and actively hostile front-line staff.	Immediate capital deployment and management restructuring are required to prevent total reputational collapse and imminent health/safety liabilities.

A UNIFORM CONSENSUS OF
TOTAL DISSATISFACTION

1.0/10

Average Score (Dominant score
across 100 consecutive reviews).

Primary Guest Demographic:
Families and Groups

Note: Amplifies the negative impact, as
hosts report feeling "insane embarrassment"
bringing relatives into the property.

TOP GUEST COMPLAINTS

THE GUEST EXPERIENCE FRACTURES AT EVERY SINGLE TOUCHPOINT

CATEGORIZING THE CRISIS INTO FOUR PILLARS OF FAILURE

HEALTH & HYGIENE CRISIS

Biohazards, pests, profound lack of cleanliness.

SEVERE MAINTENANCE DEFICITS

Plumbing failures, electrical hazards, structural decay.

FRONT-LINE STAFF BREAKDOWN

Active hostility, service refusal, lack of basic training.

THE TRUST DEFICIT

Commercial malpractice, bait-and-switch pricing, hidden deposits.

PILLAR 1 REVEALS CRITICAL HEALTH AND HYGIENE HAZARDS

DIAGNOSTIC PANEL

IDENTIFIED PATHOGENS & PESTS

- ▶ Pervasive mold covering taps and sinks.
- ▶ Documented presence of cockroaches and bed bugs in living areas and beds.
- ▶ Unwashed, stained linens and rotten smells emanating from kitchen cabinets.

OPERATIONAL IMPACT

Guests abandoning paid, multi-night stays after a single night due to physical disgust.

[CASE FILE #70]

“Whoever wants disease, bacteria, fungi, and epidemics lives in this hotel... The 250 Riyals is the price of the disease you will catch.”

Pillar 2 Exposes Severe Infrastructure and Safety Deficits

Bathroom (Plumbing)

Electric current actively felt in water taps; decorative, non-working showers; broken toilet seats.

Walls (Electrical)

Exposed electrical cables and open sockets creating severe electrocution risks for families.

Living Area (HVAC)

AC units missing flaps, actively leaking water (destroying guest electronics), and emitting smoke/burning smells.

Furnishings (Assets)

Decaying, stained sofas and "broken-back" lumpy pillows requiring immediate disposal.

PILLAR 3 HIGHLIGHTS ACTIVE HOSTILITY FROM FRONT-LINE STAFF

HOSPITALITY STANDARD

- Welcoming arrival
- Proactive problem solving
- Fulfillment of basic guest requests

CITY SUITES REALITY

- **Attitude:** Receptionists described universally as rude, unprofessional, and actively insulting.
- **Revenue Sabotage:** Staff proactively telling guests to cancel their bookings and go elsewhere.
- **Service Refusal:** Complete refusal to provide basic amenities (e.g., guests denied towels even after 6 distinct requests) or assist with luggage.

[CASE FILE #3]

Told us in a very proud and insulting manner to cancel our booking and go to another hotel.

Pillar 4 Uncovers Commercial Malpractice and a Massive Trust Deficit

Category	Expectation	Reality
Marketing	Modern suites depicted in Booking.com photography.	Ancient, decaying furniture; guest claims of "false advertising".
Pricing Transparency	Upfront pricing at the time of booking.	Sudden price hikes upon arrival; unlisted 100-200 SAR insurance deposits routinely kept by staff.
Value Delivery	Basic family accommodations.	Zero basic inventory; rooms lacking even a glass for water or a single plastic spoon.

[CASE FILE #4]

"They asked for a deposit that was not mentioned in the booking... when I left, they refused to return it."

The Human Cost of Neglect Speaks for Itself

INCIDENT RECORD: CASE #10 [FAMILY STAY]

The level of embarrassment I felt walking my family into that space was enough to drive me insane. Checked out after a single night because the suite was nowhere near livable.

INCIDENT RECORD: CASE #38 [GROUP STAY]

Worst stay ever, wished I had a tent. The reception didn't hand me a key, saying I have to find the cleaning man to open my door each time.

INCIDENT RECORD: CASE #20 [VALUE ASSESSMENT]

Nothing provided as listed. Full of dust, broken trays, worn out linen. Needs a complete revamp before letting anyone in to stay.

Cascading Failures Trace Back to Capital Starvation

Triage Prioritization Dictates Immediate Action

Phase 1 Emergency Intervention Plan (The First 30 Days)

Week 1 Week 1: Stabilize & Sanitize Week 1 - 12:37 PM	Status Deploy professional exterminators. Execute bio-hazard deep clean of all wet areas. Audit and seal all exposed electrical sockets. End	Status 10%
Week 2 Week 2: Personnel Overhaul Week 2 - 12:36 PM	Status Remove actively hostile personnel. Implement rigid Standard Operating Procedures (SOPs) for check-in and luggage assistance. Abolish hidden deposit practices. End	Status 10%
Week 3 Week 3: Infrastructure Triage Week 3 - 12:20 PM	Status Repair actively leaking HVAC units. Fix broken plumbing and secure broken toilet seats. End	Status 10%
Week 4 Week 4: Inventory Injection Week 4 - 12:55 PM	Status Restock essential, non-negotiable living amenities (towels, bed linens, basic kitchenware). End	Status 10%

Long-Term Survival Requires Immediate Capital Expenditure

The Path Forward: Intervention or Collapse

City Suites Al Khobar is currently operating far below basic legal and commercial hospitality standards.

```
graph TD; A[City Suites Al Khobar is currently operating far below basic legal and commercial hospitality standards.] --> B[THE MANDATE]; A --> C[THE CONSEQUENCE]; B --> D[INITIATE TRIAGE PROTOCOL IMMEDIATELY]; C --> D;
```

THE MANDATE

Approve the 30-Day Triage Budget.
Initiate immediate structural, cultural, and physical intervention.

THE CONSEQUENCE

Inevitable commercial closure driven by reputational destruction and imminent health/safety legal liabilities.

INITIATE TRIAGE PROTOCOL IMMEDIATELY
